

## Background information on credit ratings

Credit ratings are an important part of the Authority's investment strategy. The information below summarises some of the key features of credit ratings and why they are important.

### What is a Credit Rating ?

A credit rating is:

- An independent assessment of an organisation;
- It gauges the likelihood of getting money back on the terms it was invested;
- It is a statement of opinion, not statement of fact;
- They help to measure the risk associated with investing with a counterparty;

### Who Provides / Uses Credit Ratings?

There are three main ratings agencies, all of which are used in the Authority's treasury strategy.

- Fitch
- Moody's Investor Services
- Standard & Poors

The ratings supplied by these agencies are used by a broad range of institutions to help with investment decisions, these include:

- Local Authorities;
- Other non-financial institutional investors;
- Financial institutions;
- Regulators;
- Central Banks;

### Rating Criteria

There are many different types of rating supplied by the agencies. The key ones used by the Authority are ratings to indicate the likelihood of getting money back on terms invested. These can be split into two main categories:

- 'Short Term' ratings for time horizons of 12 months or less. These may be considered as the most important for local authorities.
- 'Long Term' ratings for time horizons of over 12 months. These may be considered as less important in the current climate.

In addition, the agencies issue sovereign, individual and support ratings which will also feed into the investment strategy.

### Rating Scales (Fitch, Moody's and Standard & Poors)

The table below shows how some of the higher graded short and long term ratings compare across the agencies; the top line represents the highest grade possible. (There are other ratings that go much lower than those shown below, and ratings for other elements.)

Short Term			Long Term		
Fitch	Moody's	S&P	Fitch	Moody's	S&P
F1+	P-1	A-1+	AAA	Aaa	AAA
F1	P-1	A-1	AA	Aa2	AA
F2	P-2	A-2	A	A2	A
