# 2014/15 Treasury Management Progress Report 11 November 2014 (Quarter 2)

## **Report of Chief Officer (Resources)**

#### 1. Introduction

The CIPFA Code of Practice on Treasury Management requires that regular monitoring reports be presented to Members on treasury activities. These reports will normally be presented after the end of June, September, December and March as part of the Council's performance management framework.

Council approved the 2014/15 Treasury Strategy, which incorporates the Investment Strategy, at its meeting on 26 February 2014. This report outlines activities undertaken in pursuance of those strategies during the financial year up to the end of Qtr 2.

Treasury management is a technical area. To assist with the understanding of this report, a glossary of terms commonly used in Treasury Management is attached at *Annex A*. In addition, the Councillor's Guide to Local Government Finance also has a section on treasury and cash management and an updated Guide is now available through the Member Information section on the Intranet.

#### 2. Summary: Headline Messages

- Icelandic Investments Only £77K still due from KSF, and £615K held in an escrow account in respect of Glitnir.
- Borrowing Activities no new borrowing has been undertaken during the second quarter of the year, and no loans have been repaid.
- Investment Activities investment interest is £7K ahead of target at the end
  of the second quarter.

#### 3. Economic update (provided by Capital Asset Services)

After strong UK GDP quarterly growth of 0.7%, 0.8% and 0.7% in quarters 2, 3 and 4 respectively in 2013, (2013 annual rate 2.7%), and 0.7% in Q1 and 0.9% in Q2 2014 (annual rate 3.2% in Q2), it appears very likely that strong growth will continue through 2014 and into 2015 as forward surveys for the services and construction sectors, are very encouraging and business investment is also strongly recovering. The manufacturing sector has also been encouraging though the latest figures indicate a weakening in the future trend rate of growth. However, for this recovery to become more balanced and sustainable in the longer term, the recovery needs to move away from dependence on consumer expenditure and the housing market to exporting, and particularly of manufactured goods, both of which need to substantially improve on their recent lacklustre performance. This overall strong growth has resulted in unemployment falling much faster through the initial threshold of 7%, set by the Monetary Policy Committee (MPC) last August, before it said it would consider any increases in Bank Rate. The MPC has, therefore, subsequently broadened its forward guidance by

adopting five qualitative principles and looking at a much wider range of about eighteen indicators in order to form a view on how much slack there is in the economy and how quickly slack is being used up. The MPC is particularly concerned that the current squeeze on the disposable incomes of consumers should be reversed by wage inflation rising back above the level of inflation in order to ensure that the recovery will be sustainable. There also needs to be a major improvement in labour productivity, which has languished at dismal levels since 2008, to support increases in pay rates. Most economic forecasters are expecting growth to peak in 2014 and then to ease off a little, though still remaining strong, in 2015 and 2016. Unemployment is therefore expected to keep on its downward trend and this is likely to eventually feed through into a return to significant increases in pay rates at some point during the next three years. However, just how much those future increases in pay rates will counteract the depressive effect of increases in Bank Rate on consumer confidence, the rate of growth in consumer expenditure and the buoyancy of the housing market, are areas that will need to be kept under regular review.

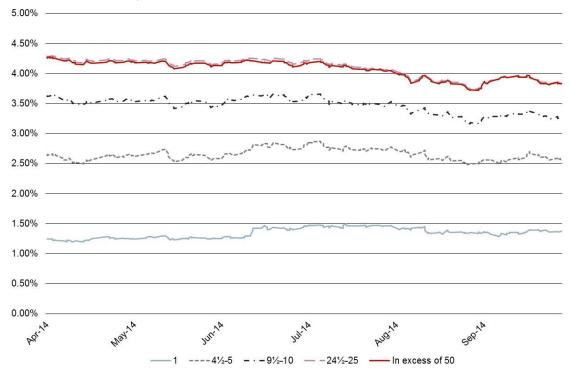

Also encouraging has been the sharp fall in inflation (CPI), reaching 1.5% in July, the lowest rate since 2009. Forward indications are that inflation is likely to fall further in 2014 to possibly 1%. The return to strong growth has also helped lower forecasts for the increase in Government debt by £73bn over the next five years, as announced in the Autumn Statement, and by an additional £24bn, as announced in the March 2014 Budget - which also forecast a return to a significant budget surplus, (of £5bn), in 2018-19. However, monthly public sector deficit figures have disappointed so far this year.

In September, the U.S. Federal Reserve continued with its monthly \$10bn reductions in asset purchases, which started in December 2014. Asset purchases have now fallen from \$85bn to \$15bn and are expected to stop in October 2014, providing strong economic growth continues. First quarter GDP figures were depressed by exceptionally bad winter weather, but quarter 2 rebounded strongly to 4.6%.

The Eurozone is facing an increasing threat from deflation. In September, the inflation rate fell further, to reach 0.3%. However, this is an average for all EZ countries and includes some countries with negative rates of inflation. Accordingly, the ECB did take some rather limited action in June and September to loosen monetary policy in order to promote growth.

#### 4. Borrowing Activities

No new borrowing was undertaken during Qtr 1. The following graph shows the PWLB rates for the first half of this year.

#### **Early Repayment of Debt**

Officers continue to monitor potential saving opportunities associated with the early repayment of existing debt. This takes into account the premiums or discounts associated with early repayment and the projected cost of refinancing or loss in investment interest. At present, it would not be financially prudent to repay any debt based on the current rates being offered.

### 5. Investing Activities

As laid down in the approved Investment Strategy, the aim is to prioritise security and liquidity of the Council's investments. This is to ensure that the Council has sufficient cash to support its business, but also to minimise any further chance of a counterparty failing and the Council not being able to remove any cash deposited.

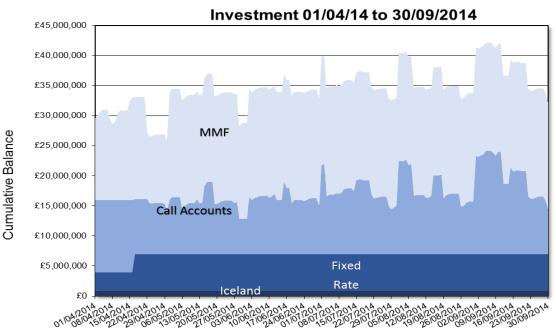

All investment activity has been in line with the approved Treasury Strategy for 2014/15. A full list of the investments at the end of Qtr 2 is shown below (Table 6.1):

Table 6.1 Counterparty balances

Other Investments	Opening £	Min £	Max £	Closing £	Indicative rate	Cumulative Interest £
Call: RBS	0	0	0	0	0.25%	0
Call: Lancashire County Council	12,000,000	1,385,000	11,383,000	2,024,000	0.25%	7,078
Call: Svenska Handelsbanken	0	0	5,864,000	5,864,000	0.40%	9,863
DMADF	0	0	0	0	0.25%	0
Government Liquidity MMF	3,038,000	6,000,000	6,000,000	6,000,000	0.27%	7,001
Liquidity First MMF.	6,000,000	6,000,000	6,000,000	6,000,000	0.40%	11,765
Insight MMF	6,000,000	6,000,000	6,000,000	6,000,000	0.37%	10,701
Lloyds	3,000,000	6,000,000	6,000,000	6,000,000	0.60%	17,260
Sub-total	27,038,000			25,888,000		63,669

Below is a graph which displays the different investment products used by the Council. The majority of the Council's balances are held within instant access MMF's or call accounts. This is partly because there are prudential controls that ensure a certain percentage is immediately available and also there is only a small pool of counterparties that meet the Council's credit criteria for fixed term deposits. Other UK banks, that meet the criteria such as HSBC, require much larger investment and market themselves at much larger institutional investors or corporations.

Graph 6.1 Investment balances

#### **Summary of Budget Position and Performance**

In terms of performance against external benchmarks, the return on investments compared to the 7 day LIBID and bank rates over the year to date is as follows:

Base Rate	0.500%
7 day LIBID	0.358%
Lancaster City Council investments	0.380%

These rates do not take into consideration the funds held in a foreign bank account from an Icelandic bank settlement. These funds are attracting interest at 4.2%.

In terms of performance against budget, the details are as follows:

	Budget to Date £000's	Actuals to Date £000's	Variance £000's
Icelandic Credits	12	15	(3)
Cash Interest	60	64	(4)
Total	72	79	(7)

Investment returns, excluding balances held in the Icelandic account, exceed the budgeted level. This is due to cash balances being larger than expected as a result of delays within the capital programme.

## 6. Risk management

There has been no material change in the policy or operation of the treasury function over the quarter. However, officers are now looking at alternative investment matrices to determine if investment returns could be increased whilst minimising the Council's exposure to additional risks. Secondly, as the cash flow need to keep investments short has diminished, particularly in light of the latest settlement date on certain significant NNDR appeals being pushed back to 2017, officers will now be firming up cash flow forecasts with a view to placing longer term investments.

The funds being held in Iceland still expose the Council to exchange rate risks, but these are unavoidable.

There is financial risk attached to the longer term debt portfolio, associated with interest rate exposure but all of the debt is on fixed interest and there has been no change to this over the quarter. Low investment returns mean that using cash invested to repay debt can appear more attractive, but the Council is not yet in a clear enough position to be following such a strategy.

Cash balances held with The Cooperative Bank continue to be monitored on a daily basis following the banks crisis in relation to its funding gap. The bank falls short of the council credit rating criteria and has not been on the approved lending list for some time.

#### 7. Prudential Indicators

These indicators are prescribed by the Prudential Code to help demonstrate that the Council can finance its debt and have funds available when needed. The prudential indicators are listed in **Annex B**.

#### 8. Conclusion

Investment activity has remained relatively unchanged and returns are expected to remain fairly static until the final quarter of this financial year.

## **Treasury Management Glossary of Terms**

- Annuity method of repaying a loan where the payment amount remains uniform throughout
  the life of the loan, therefore the split varies such that the proportion of the payment relating to
  the principal increases as the amount of interest decreases.
- CIPFA the Chartered Institute of Public Finance and Accountancy, is the professional body for accountants working in Local Government and other public sector organisations, also the standard setting organisation for Local Government Finance.
- Call account instant access deposit account.
- **Counterparty** an institution (e.g. a bank) with whom a borrowing or investment transaction is made.
- Credit Rating is an opinion on the credit-worthiness of an institution, based on judgements about the future status of that institution. It is based on any information available regarding the institution: published results, Shareholders' reports, reports from trading partners, and also an analysis of the environment in which the institution operates (e.g. its home economy, and its market sector). The main rating agencies are Fitch, Standard and Poor's, and Moody's. They analyse credit worthiness under four headings:
  - **Short Term Rating** the perceived ability of the organisation to meet its obligations in the short term, this will be based on measures of liquidity.
  - **Long Term Rating** the ability of the organisation to repay its debts in the long term, based on opinions regarding future stability, e.g. its exposure to 'risky' markets.
  - Individual/Financial Strength Rating a measure of an institution's soundness on a stand-alone basis based on its structure, past performance and credit profile.
  - **Legal Support Rating** a view of the likelihood, in the case of a financial institution failing, that its obligations would be met, in whole or part, by its shareholders, central bank, or national government.

The rating agencies constantly monitor information received regarding financial institutions, and will amend the credit ratings assigned as necessary.

- DMADF and the DMO The DMADF is the 'Debt Management Account Deposit Facility'; this is
  highly secure fixed term deposit account with the Debt Management Office (DMO), part of Her
  Majesty's Treasury.
- **EIP** Equal Instalments of Principal, a type of loan where each payment includes an equal amount in respect of loan principal, therefore the interest due with each payment reduces as the principal is eroded, and so the total amount reduces with each instalment.
- Gilts the name given to bonds issued by the U K Government. Gilts are issued bearing
  interest at a specified rate, however they are then traded on the markets like shares and their
  value rises or falls accordingly. The Yield on a gilt is the interest paid divided by the Market
  Value of that gilt.
  - E.g. a 30 year gilt is issued in 1994 at £1, bearing interest of 8%. In 1999 the market value of the gilt is £1.45. The yield on that gilt is calculated as 8%/1.45 = 5.5%. See also PWLB.

- **LIBID** The London Inter-Bank Bid Rate, the rate which banks would have to bid to borrow funds from other banks for a given period. The official rate is published by the Bank of England at 11am each day based on trades up to that time.
- **LIBOR** The London Inter-Bank Offer Rate, the rate at which banks with surplus funds are offering to lend them to other banks, again published at 11am each day.
- Liquidity Relates to the amount of readily available or short term investment money which can be used for either day to day or unforeseen expenses. For example Call Accounts allow instant daily access to invested funds.
- **Maturity** Type of loan where only payments of interest are made during the life of the loan, with the total amount of principal falling due at the end of the loan period.
- Money Market Fund (MMF) Type of investment where the Council purchases a share of a
  cash fund that makes short term deposits with a broad range of high quality counterparties.
  These are highly regulated in terms of average length of deposit and counterparty quality, to
  ensure AAA rated status.
- Policy and Strategy Documents documents required by the CIPFA Code of Practice on Treasury Management in Local Authorities. These set out the framework for treasury management operations during the year.
- Public Works Loans Board (PWLB) a central government agency providing long and short term loans to Local Authorities. Rates are set daily at a margin over the Gilt yield (see Gilts above). Loans may be taken at fixed or variable rates and as Annuity, Maturity, or EIP loans (see separate definitions) over periods of up to fifty years. Financing is also available from the money markets, however because of its nature the PWLB is generally able to offer better terms.
- Capita Asset Services are the City Council's Treasury Management advisors. They provide advice on borrowing strategy, investment strategy, and vetting of investment counterparties, in addition to ad hoc guidance throughout the year.
- Yield see Gilts

Members may also wish to make reference to *The Councillor's Guide to Local Government Finance*.
